Requirements for article/information submission in LOICZ INPRINT

LOICZ INPRINT is distributed worldwide in hard copy to approximately 700 scientists and institutions and also sent electronically to over 300 e-mail addresses.

For articles please note the following requirements:

- Please submit text (between 1000-1500 words; more is allowed if it's not too much; less is also allowed) in MS Word format, and figures/pictures as separate files in EPS format or as high quality TIFF files (300 DPI or greater). Please do not embed your figures in a Word document as they lose a lot of their resolution when they are extracted from Word.

Important note: The LOICZ IPO is entitled to make minor edits before printing. If major edits are required you will be consulted.

The e-mail address to send your contribution to is: loicz.ipo@loicz.org

Announcements of meetings, workshops, conferences, publications or other relevant information can also be submitted. Please always provide either a url or contact person and e-mail address for further information. For these sorts of announcements LOICZ also circulates an e-mail with upcoming events and notices. The frequency varies depending on number of announcements and deadlines.

Looking forward to your contribution.
