

MALAYSIAN SITE SYNTHESIS

1996-1999 FINAL REPORT

**Carbon and Nutrient Fluxes and Socio-Economic Studies
in the Merbok Mangrove Estuary
(A SARCS/WOTRO/LOICZ/USM PROJECT)**

Universiti Sains Malaysia, Penang, 1999

SARCS/WOTRO/LOICZ Malaysian Site Synthesis

Carbon and Nutrient Fluxes and Socio-Economic Studies in the Merbok Mangrove Estuary

THE MALAYSIAN SWOL TEAM

Leader
Ecologist
Planner
Economist
Research Officers

Professor Ong Jin Eong
Dr Gong Wooi Khoon
Dr Alip bin Rahim
Dr Chan Huan Chiang
Ms Nor Haida bte Hassan
Mr Kumaradevan a/l Saminithan
Mr Wong Ya Ping
Mr Lee Leng Choy
Mr Adrain Chang Kok Teong

Laboratory assistants

Mr Mohd Hussain bin Yahya
Mr Ab. Rahaman bin Abdullah
Mr Abdul Mutalib bin Saad

Plus, for “Merbok 97”, “Bujang 98”, “BMD 98”
and “MMD 99”:
Collaborating scientists

Profesor John Simpson
Dr Ross Vennel
Mr Omar bin Ahmad
Ms Foong Swee Yeok
Ms Khairun bte Yahya

Research Officer
Post-graduate students

Universiti Sains Malaysia,
Penang, December 1999

ACKNOWLEDGMENTS

We thank WOTRO, SARCS and LOICZ for their continued interest and support. We especially thank Dr Renée van Kessel for her very efficient and gracious administration of the project. All the major equipment used in this project (amounting to around US\$ 1 million) was purchased under previous grants or by Universiti Sains Malaysia and for this we gratefully acknowledge the International Development Research Centre (IDRC) of Canada (Mangrove:Malaysia), AIDAB, now AUSAID (ASEAN-Australia Cooperative Programme on Marine Science, Phases I and II) and the Government of Malaysia's Intensification of Research In Priority Areas (IRPA) Grants (Mangrove Estuarine Studies). We also thank ACIAR (Australian Centre for International Agricultural Research) for funding a complementary project (with CSIRO Fisheries) on mangrove prawns. We are grateful to Universiti Sains Malaysia for equipment, infrastructural, administrative and other support. Last, we thank the numerous people (research officers, technical/support staff and postgraduate and undergraduate students) who so cheerfully assisted us with our arduous field and laboratory work.

TABLE OF CONTENTS

1. INTRODUCTION	1
1.1. Background	1
1.2. Objectives	2
1.3. Site description	2
1.3.1. Sg. Merbok mangroves	2
1.3.2. Brief socioeconomic profile	4
1.3.2.1. Human population	4
1.3.2.2. Land use change	5
2. BIOGEOCHEMICAL CYCLES AND PROCESSES	7
2.1. Approaches	7
2.2. Stoichiometrically linked water, carbon and nutrient budgets	7
2.2.1. Salinity distribution / mixing	7
2.2.2. Water budget	8
2.2.3. Salt budget	9
2.2.4. Dissolved phosphorus budget	10
2.2.5. Dissolved nitrogen budget	11
2.2.6. Non-conservative fluxes	11
2.2.7. C:N:P ratio	12
2.2.8. Productivity minus respiration ($p-r$)	13
2.2.9. Nitrogen fixation minus denitrification ($nfix-denit$)	13
2.2.10. Discussion	14
2.3. Mixing diagrams	15
2.3.1. Salinity distribution / mixing	15
2.3.2. Ammonia	16
2.3.3. Dissolved inorganic nitrogen (DIN)	17
2.3.4. Dissolved organic nitrogen (DON)	18
2.3.5. Discussion (nitrogen)	18
2.3.6. Dissolved inorganic phosphorus (DIP)	19
2.3.7. Dissolved organic phosphorus (DOP)	19
2.3.8. Discussion (phosphorus)	20
2.4. Water discharge and material fluxes from an estuarine mouth cross-section	21
2.4.1. Data from "Merbok 97"	21
2.4.2. Discussion ("Merbok 97" fluxes)	25
2.5. General discussion	26
3. ECONOMIC ACTIVITIES AND PROCESSES	28
3.1. Approaches	28
3.2. Brief socioeconomic profile of the Merbok	29

Malaysia

3.2.1.	Mangroves	29
3.2.2.	Fisheries	30
3.2.3.	Mariculture	32
3.2.4.	Rubber & oil palm	33
3.2.5.	Rice	33
3.3.	Economic (input/output) model	34
3.3.1.	Economic planning in the Merbok	35
3.4.	Alternative economic approaches	39
3.4.1.	Tracking economic indicators/indices	39
3.4.2.	Econometric model	40
3.4.3.	Discussion (alternative economic models)	41
4.	INTEGRATED MODELS	42
4.1.	Approach and background theories	42
4.1.1.	Ecological-economic residuals generation i/o framework (Isard)	43
4.1.2.	Simultaneous dynamic i/o model (Johansen)	43
4.1.3.	Interactive ecologic-economic model (Miller and Blair)	44
4.1.4.	Odum's "embodied energy"	45
4.1.5.	Bioeconomic renewable resource model (Wilen)	47
4.1.6.	Integrated models comparison	47
4.2.	Implementation of the ecologic (C, N and P residuals) -economic (I/O) model in the Merbok mangrove catchment	49
4.2.1.	Estimation of C, N and P residuals	49
4.2.1.1.	Agriculture	49
4.2.1.2.	Fishing	50
4.2.1.3.	Forestry	50
4.2.1.4.	Other sectors	50
4.2.2.	Results	51
4.3.	Bio-economic renewable resource model (mangrove charcoal)	53
4.4.	Discussion	53
5.	CONCLUSIONS AND RECOMMENDATIONS	54
6.	REFERENCES	56
