

SARCS/WOTRO/LOICZ PHILIPPINES CORE RESEARCH SITE

1996-1999 FINAL REPORT

Economic Evaluation and Biophysical Modelling of the Lingayen Gulf in Support of Management for Sustainable Use

Marine Science Institute, University of the Philippines
October 2000

SARCS/WOTRO/LOICZ Philippines Core Research Site

1996-1999 Final Report

Economic Evaluation and Biophysical Modelling of Lingayen Gulf in Support of Management for Sustainable Use

Research Team

Dr Liana Talaue-McManus, *Principal Investigator*
Roberto S. Clemente, *Hydrologist*
Prof. Edgardo Gomez, *Coordinator*
Dr Wilfredo Y. Licuanan, *Marine Ecologist*
Mr Douglas McGlone, *Economic Modeller*
Dr Maria Lourdes San Diego McGlone, *Chemical Oceanographer*
Dr Fernando P. Siringan, *Marine Geologist*
Dr Cesar L. Villanoy, *Physical Oceanographer*

Research Associates

Charina Lyn. A. Amedo Leah N. Asuncion Jack B. Barajas
Herminia R. Caringal Charisma G. de Castro Vilma S. Dupra
Elizabeth Francisco Zenon Richard P. Mateo Daisy O. Padayao
Kathleen M. Silvano Edwin N. Wilson

Collaborating institutions

Marine Science Institute, University of the Philippines
National Institute of Geological Sciences, University of the Philippines
Environmental Science Program, University of the Philippines
Department of Biology, De La Salle University

Marine Science Institute, University of the Philippines, Quezon City
October 2000

ACKNOWLEDGEMENT

We wish to thank WOTRO, LOICZ and SARCS for the fruitful collaboration and support for the period 1996-1999. The assistance and encouragement of Renee van Kessel, John Pernetta, Steven Smith, Paul Boudreau, Bradley Opdyke, Neil Adger, Jean-Luc de Kok, Hartwig Kremer, Chris and Jan Crossland are gratefully acknowledged. Concurrent grants from the Philippine Department of Science and Technology to the Marine Science Institute have provided access to major oceanographic equipment and ship time. The partnerships with the UP National Institute of Geology and the Environmental Science Program and with the De La Salle University Department of Biology have been invaluable in realizing the goals of the project.

TABLE OF CONTENTS

| | |
|---|----|
| SYNTHESIS REPORT | 1 |
| 1. INTRODUCTION | 1 |
| 1.1 Design of the Philippines core site study | 1 |
| 1.2 Physiographic setting of the Lingayen Gulf watershed | 2 |
| 1.3 Climate | 2 |
| 1.4 River systems draining into Lingayen Gulf | 2 |
| 1.5 Circulation | 4 |
| 1.6 Anthropogenic activities in catchment and coastal areas | 11 |
| 1.6.1 Political boundaries | 11 |
| 1.6.2 Human resources | 12 |
| 1.6.3 Economic activity | 14 |
| 1.6.4 Land use and land use change | 14 |
| 2. SOCIOECONOMIC PROCESSES AND MODELS | 16 |
| 2.1 Residual generation models | 16 |
| 2.2 IO model | 18 |
| 3. BIOGEOCHEMICAL CYCLES AND PROCESSES | 21 |
| 3.1 Methods | 21 |
| 3.2 Results | 25 |
| 4. RECOMMENDATIONS AND FUTURE DIRECTIONS | 31 |
| 4.1 Strengths and weaknesses of the overall SWOL approach | 31 |
| 4.2 Strengths and weaknesses of studying biological and economic processes | 32 |
| 4.3 Utility of research results to management | 32 |
| 4.4 Utility of research results to characterisation of coastal zones within country and Southeast Asia | 33 |
| 5. REFERENCES | 33 |
| APPENDICES | 36 |
| Appendix A Land use changes within the Agno watershed (1986-1993) – <i>F. Siringan and E. Francesco</i> | 36 |
| Appendix B Economic modelling of residual generation for the Lingayen Gulf watershed – <i>D. McGlone and H. Caringal</i> | 42 |
| Appendix C Sediment load partitioning of the Agno River and changes in the shoreline position – <i>F.P. Siringan and Z.R.P. Molto</i> | 56 |
| Appendix D Hydrologic and physico-chemical modelling of the watersheds draining into Lingayen Gulf – <i>R.S. Clements and E.N. Wilson</i> | 61 |
| Appendix E Circulation in Lingayen Gulf inferred from temperature and salinity – <i>C. Villanoy</i> | 77 |
| Appendix F N and P budgets for Lingayen Gulf, Philippines – <i>M.L. San Diego McGlone, V. Dupra, D. Padayao and J. Abalos</i> | 82 |
| Appendix G Primary production and fisheries in Lingayen Gulf, northern Philippines: biological oceanography component – <i>L. Talaue McManus, W. Licuanan, L. Asuncion, K. Silvano, M. Bonga and C. de Castro</i> | 88 |
