ACKNOWLEDGEMENT

The SARCS/WOTRO/LOICZ is a designed research core project of IGBP. Funding by the Netherlands Foundation for the Advancement of Tropical Research (WOTRO), under the project 'Economic Evaluation Studies of Mangrove Conservation and Rehabilitation in Nam Ha Province (Red River Delta) in Vietnam is gratefully acknowledged, especially for the very kind encouragement of Dr. Renee van Kessel for the project. Assistance in the form of methodology for evaluating the total economic value has been given by the Center for Social and Economic Research on the Global Environment (CSERGE), University of East Anglia, UK. Numerous other people who supported our research project are also thanked.

TABLE OF CONTENTS

PROJECT OVERVIEW	1
Reasons to care	1
Relevance to LOICZ and SARCS	1
A new approach	1
Main results	2
SYNTHESIS REPORT	3
1. Description of the site	3
1.1. Geological history and coastal morphology	3
1.2. Climate features	5
1.3. Catchments	6
1.4. Mangroves and sea grasses	8
1.5. Human activities	9
2. The biogeochemical model	13
2.1. Methodology	13
2.2. Results	16
2.2.1. Water and salt budget	16
2.2.2. DIP budgets	17
2.2.3. DIN budget	18
2.2.4. Modelling	19
2.3. Conclusion	21
3. The regional Input - Output model	25
3.1. The region and surveys	25
3.2. Constructing the regional I-O table	25
3.3. Estimating residuals generated from production and consumption	30
3.4. Forecasting the relationship between economic growth and residual generation	31
3.5. Testing the extension of the I-O model in analysis of feedback	31
Appendix: Technical notes	34
4. The integrated economic-environmental modelling	41
4.1. Estimation of modelling components	41
4.1.1. Nitrogen source from direct rainfall	41
4.1.2. Nitrogen source from forest run-off	42
4.1.3. Nitrogen sources from outside the national border.	42
4.1.4. Nitrogen generation from economic activities	43
4.2. Integrated modelling	44
4.2.1. Integrated model for nitrogen	44
4.2.2: Scenario development for the integrated modelling	45
4.3. Testing Dose-Response model	46
Proposed indicators for sustainable management	46
5. Conclusion and suggestions	47
6. References	48
